

Adani Mining Pty Ltd is a subsidiary of Adani Enterprises Limited (AEL), one of the largest diversified businesses in India with interests in Infrastructure, Energy and Atribusiness. Adani Mining recently acquired a 100% interest in Galilee Coal Tenement (EPC 1690) which is now called “Carmichael Coal Project” with an estimated 7.8 billion tonne of coal resources. The mine is located approximately 160km to the north-west of Clermont, which in turn is located approximately 100km north of Emerald. Development has commenced to establish a 60 million tonne per annum (MTPA) coal mine with mine life of more than 100 years. This is the largest ever investment by any Indian Company in Australia.

When fully developed, the Carmichael Coal Mine will be the largest coal mine in Queensland. The proposed mine involves the development of both a greenfield open-cut mine and an underground mine, supported by rail facilities leading to coal export terminals at both Abbot Point or Hay Point. Export coal from the Project will predominantly service the Indian domestic power market.

The mine infrastructure, rail and port will require a total investment of approximately \$6.8 billion for construction.

The principal features of the Adani Group are:

Port ownership and operations:

- Own and operate Mundra Port, India’s largest private sector port, which includes the world’s largest coal import terminal rated at 60 mtpa capacity;
- Four other bulk cargo terminals under operations and development in India;
- Recently acquired the multi-user Abbot Point Coal Terminal near Bowen in Queensland with a 50 mtpa capacity; and
- Own and operate two Capesize vessels (175,000 dwt each).

Power generation:

- Current power generation capacity of 6,000MW in India.
- Plan to commission 20,000 MW coal based thermal power at six different locations in India by 2020.

Coal mining and coal trading:

- Largest trader of thermal coal in India;
- Operating a thermal coal mine in Indonesia with present production of 6 mtpa being expanded to 11 mtpa;
- Mine Developer and Operator for coal mines in India for 130 mtpa contracted volume to supply state-owned utilities (coal mining is not permitted in India for the private sector except for captive use). Development involves construction of 200 kms of rail and a coal terminal on the East coast of India.
